Off-Grid solar, urban/remote critical and back-up power has been the driving force for us to stay on top of the latest technology and trends.

Advenergy continues to be suppliers and installers for Bell Canada's power systems for applications such as high-speed communication and critical power for their disaster recovery and data centers.

Our Philosophy

- Progressive enhancing design using sustainable technology
- Put back more than we use
- Produce sustainable products and mechanisms
- Pre-cycle (think before we buy)
